***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) **1-9**, drawn to a zinc or zinc alloy electroplating bath.

Group II, claim(s) **10-18**, drawn to a zinc or zinc alloy electroplating bath.

Group III, claim(s) **19**, drawn to a brightening agent.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The brightening agent of Group III is not distinguished by its use in a zinc or zinc alloy electroplating bath.

The polyamines have different chemical structures which are not all required to be the same for each invention, and some polyamines are in mixtures while other polyamines are in the same polymer chain.

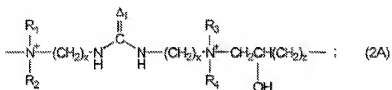

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so

linked as to form a single general inventive concept under PCT Rule 13.1.

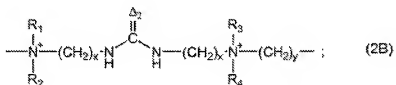

The species are as follows:

If Group I is elected, then the following species restriction requirement applies:

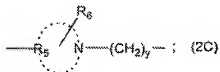

The Second Repeating Unit (please select one):

(i)

(ii)

(iii)

(Claim 1).

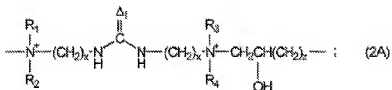

The Polyamine Combination (please select one):

- (i) The first repeating unit recited in Claim 2.
- (ii) The mixture of polyamines recited in Claim 3.
- (iii) The mixture of polyamines recited in Claim 4.
- (iv) The first repeating unit and the second repeating unit being in the same polymer chain (Claim 5).

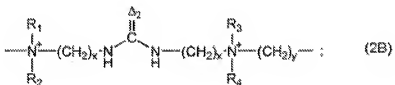

- (v) The polyamine recited in Claim 6.
- (vi) The polyamine recited in Claim 7.
- (vii) The polyamine recited in Claim 8.
- (viii) The polyamine recited in Claim 9.

If Group II is elected, then the following species restriction requirement applies:

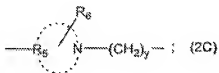

The Second Repeating Unit (please select one):

(i)

(ii)

(iii)

(Claim 10).

The Polyamine Combination (please select one):

- (i) The second repeating unit recited in Claim 11.
- (ii) The second repeating unit recited in Claim 12.

- (iii) The second repeating unit recited in Claim 13.
- (iv) The mixture of polyamines recited in Claim 14.
- (v) The first repeating unit and the second repeating unit being in the same polymer chain (Claim 15).
- (vi) The polyamine recited in Claim 16.
- (vii) The polyamine recited in Claim 17.
- (viii) The polyamine recited in Claim 18.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner: See above.

The following claim(s) are generic: none.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: The polyamines have different chemical structures which are not all required to be the same for each invention, and some polyamines are in mixtures while other polyamines are in the same polymer chain.

**Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined** even though the requirement may be traversed (37 CFR 1.143) and **(ii) identification of the claims encompassing the elected invention.**

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
